Author Index

Albrecht, S.L., *see* DeVries, J.D. et al.
Andrade, F.H., *see* Slafer, G.A. and Andrade, F.H.
Arora, V.K., *see* Gajri, P.R. et al.
Baker, D.G., *see* Sharratt, B.S. et al.
Beech, D.F., Stutzel, H. and Charles-Edwards, D.A.
Yield determinants of guar (*Cyamopsis tetragonoloba*). 1. Grain yield and pod number ... 29
Beech, D.F., *see also* Stutzel, H. et al.
Bennett, J.M., *see* Jones, G.P.D. et al.
Blair, G.J., *see* Jones, G.P.D. et al.
Bland, W.L., *see* Dugas, W.A. and Bland, W.L.
Boote, K.J., *see* DeVries, J.D. et al.
Byth, D.E., *see* Troedson, R.J. et al.
Charles-Edwards, D.A., *see* Beech, D.F. et al.
see also Stutzel, H. et al.
Clarke, A.S., *see* Pilbeam, C.J. et al.
Delécolle, R., Hay, R.K.M., Guérif, M., Pluchard, P. and Varlet-Grancher, C.
A method of describing the progress of apical development in wheat, based on the time-course of organogenesis 147
DeVries, J.D., Bennett, J.M., Albrecht, S.L. and Boote K.J.
Water relation, nitrogenase activity and root development of three grain legumes in response to soil water deficits 215
Dugas, W.A. and Bland, W.L.
Effect of bordering soil surface moisture conditions on evaporation from soybean 161
Erskine, W., *see* Silim, S.N. et al.
Evans, L.T.
Book review of *Origin of Cultivated Rice*, by H.I. Oka 167
Ezumah, H.C., *see* Ikeorgu, J.E.G. et al.
Fereres, E., *see* Puech-Suanzes, I. et al.
Frederick, J.R., Woolley, J.T., Hesketh, J.D. and Peters, D.B.
Phenological responses of old and modern soybean cultivars to air temperature and soil moisture treatment 9
Fukai, S.
Book review of *Rice Ratooning*, by The International Rice Research Institute, Los Baños, Laguna, The Philippines 169
see also Tsay, J.S. et al.
Gajri, P.R., Prihar, S.S. and Arora, V.K.
Effects of nitrogen and early irrigation on root development and water use by wheat on two soils 103
Gorman, D.P., *see* Kang, M.S. et al.
Guérif, M., *see* Delécolle, R. et al.
Gulliever, B.
Book review of *Comparative Experiments with Field Crops*, by G.V. Dyke 301

Gyles, O.A., *see* Smith, C.J. et al.
Hall, A.E., *see* Kirchhoff, W.R. et al.
Harville, B.G., *see* Kang, M.S. et al.
Hay, R.K.M., *see* Delécolle, R. et al.
Hebblethwaite, P.D., *see* Pilbeam, C.J. et al.
Henderson, D.W., *see* Puech-Suanzes, I. et al.
Hesketh, J.D., *see* Frederick, J.R. et al.
Hsiao, T.C., *see* Puech-Suanzes, I. et al.
Ikeorgu, J.E.G., Ezumah, H.C. and Wahua, T.A.T.
Productivity of species in cassava/maize/okra/egusi melon complex mixtures in Nigeria . 1
Imrie, B.C.
Book review of *Improvement of Grain Legume Production Using Induced Mutations*, by the International Atomic Energy Agency, Vienna 303
Isom, W.H., *see* Kirchhoff, W.R. et al.
Jenkins, J.N., *see* Milam, M.R. et al.
Jessop, R.S., *see* Jones, G.P.D. et al.
Jones, G.P.D., Blair, G.J. and Jessop, R.S.
Phosphorus efficiency in wheat - a useful selecton criterion? 257
Kang, M.S., Harville, B.G. and Gorman, D.P.
Contribution of weather variables to genotype × environment interaction in soybean 297
Kirby, E.J.M.
Book review of *Yield Formation in the Main Field Crops*, by J. Petr et al. 79
see also Loss, S.P. et al.
see also Siddique, K.H.M. et al.
Kirchhoff, W.R., Hall, A.E. and Isom, W.H.
Phenotypic expression of a chlorophyll mutant in cowpea (*Vigna unguiculata*): Environmental influences and effects on productivity 19
Lawn, R.J., *see* Troedson, R.J. et al.
Loss, S.P., Kirby, E.J.M., Siddique, K.H.M. and Perry, M.W.
Grain growth and development of old and modern Australian wheats 131
McCarty, J.C., Jr., *see* Milam, M.R. et al.
Miglietta, F.
Effect of photoperiod and temperature on leaf initiation rates in wheat (*Triticum* spp.) . 121
Milam, M.R., Jenkins, J.N., McCarty, J.C. Jr. and Parrott, W.L.
Breeding upland cotton for resistance to the tarnished plant bug 227
Osmanzai, M., *see* Ransom, J.K. et al.
Parrott, W.L., *see* Milam, M.R. et al.
Perry, M.W., *see* Loss, S.P. et al.
see also Siddique, K.H.M. et al.
Peters, D.B., *see* Frederick, J.R. et al.
Pilbeam, C.J., Hebblethwaite, P.D. and Clarke, A.S.
Effect of different inter-row spacings on faba beans of different form 203
Pluchard, P., *see* Delécolle, R. et al.
Prihar, S.S., *see* Gajri, P.R. et al.
Puech-Suanzes, I., Hsiao, T.C., Fereres, E. and Henderson, D.W.
Water-stress effects on the carbon exchange rates of three upland cotton (*Gossypium hirsutum*) cultivars in the field 239
Ransom, J.K., Waddington, S.R. and Osmanzai, M.
Effect of yellow-berry on field emergence of spring wheat 115
Ross, G.J.S.
Book review of *Biomathematics and its Application in Plant Cultivation*, by István Bán . 304

Saxena, M.C., *see* Silim, S.N. et al.
Sharratt, B.S., Sheaffer, C.C. and Baker, D.G.
Base temperature for the application of the growing-degree-day model to field-grown alfalfa 95
Sheaffer, C.C., *see* Sharratt, B.S. et al.
Siddique, K.H.M., Kirby, E.J.M. and Perry, M.W.
Ear:stem ratio in old and modern wheat varieties; relationship with improvement in number of grains per ear and yield 59
Siddique, K.H.M., *see also* Loss, S.P. et al.
Silim, S.N., Saxena, M.C. and Erskine, W.
Effect of cutting height on the yield and straw quality of lentil and on a succeeding wheat crop 49
Singh, K.N., *see* Swarup, A. and Singh, K.N.
Slafer, G.A. and Andrade, F.H.
Genetic improvement in bread wheat (*Triticum aestivum*) yield in Argentina 289
Smith, C.J., Whitfield, D.M., Gyles, O.A. and Wright, G.C.
Nitrogen fertilizer balance of irrigated wheat grown on a red-brown earth in south-eastern Australia 265
Stutzel, H., Beech, D.F. and Charles-Edwards, D.A.
Yield determinants of guar (*Cyamopsis tetragonoloba*). 2. Nitrogen accumulation and growth at high plant density 39
Stutzel, H., *see* Beech, D.F. et al.
Swarup, A. and Singh, K.N.
Effect of 12 years' rice/wheat cropping sequence and fertilizer use on soil properties and crop yields in a sodic soil 277
Troedson, R.J., Lawn, R.J., Byth, D.E. and Wilson, G.L.
Response of field-grown soybean to saturated soil culture
1. Patterns of biomass and nitrogen accumulation 171
2. Effect of treatments to alter photosynthesis and leaf nitrogen supply 189
Tsay, J.S., Fukai, S. and Wilson, G.L.
Growth and yield of cassava as influenced by intercropped soybean and by nitrogen application 83
Varlet-Grancher, C., *see* Delécolle, R. et al.
Waddington, S.R., *see* Ransom, J.K. et al.
Wahua, T.A.T., *see* Ikeorgu, J.E.G. et al.
Whitfield, D.M., *see* Smith, C.J. et al.
Wilson, G.L., *see* Troedson, R.J. et al.
see also Tsay, J.S. et al.
Woolley, J.T., *see* Frederick, J.R. et al.
Wright, G.C., *see* Smith, C.J. et al.

Subject Index

Abelmoschus spp
Productivity in cassava/maize/okra/egusi melon mixtures 1
Alfalfa, *see Medicago* spp.
Arachis spp.
Water relations, nitrogenase activity and root development of legumes in response to water deficits 215
Breeding
Phenotypic expression of a chlorophyll mutant in *Vigna unguiculata*: Environmental influence and effects on productivity 19
Genetic improvement in *Triticum* yield 289
Induced mutations in grain legumes (book review) 303
Cajanus spp.
Water relations, nitrogenase activity and root development of legumes in response to water deficits 215
Carbon exchange rate, *see* Phenology
Cassava, *see Manihot* spp.
Citrullus spp.
Productivity in cassava/maize/okra/egusi melon mixtures 1
Corn, *see Zea* spp.
Cotton, *see Gossypium* spp.
Cowpea, *see Vigna* spp.
Cyamopsis spp.
Yield determinants of guar
1. Grain yield and pod number 29
2. Nitrogen accumulation and growth at high plant density 39
Ear:stem ratio, *see* Phenology
Environment, influence of
Phenological responses of soybean to air temperature and soil moisture 9
Phenotypic expression of a chlorophyll mutant in *Vigna unguiculata*: Environmental influences and effects on productivity 19
Effects of nitrogen and early irrigation on root development and water use by wheat on two soils 103
Effect of photoperiod and temperature on leaf initiation in wheat 121
Describing progress of apical development in wheat, based on time-course of organogenesis 147
Nitrogen balance of irrigated wheat on a red-brown earth 265
Effect of 12 years' rice/wheat cropping and fertilizer on soil properties and crop yields in a sodic soil 277
Contribution of weather to genotype × environment interaction in soybean 297
Faba bean, *see Vicia* spp.
Fertilizers, *see* Nutrient dynamics
Field crops, general
Crop physiology in Czechoslovakia (book review) 79
Field crop experimentation (book review) 301
Genotype effects, *see* Variety trials
Glycine spp.
Phenological responses to air temperature and soil moisture 9
Growth and yield of cassava influenced by soybean and nitrogen 83

Effect of bordering soil moisture conditions on evaporation from soybean 161
Response to saturated soil
1. Patterns of biomass and nitrogen accumulation 171
2. Effect of treatments to alter photosynthesis and leaf nitrogen supply 189
Water relations, nitrogenase activity and root development of legumes in response to water deficits 215
Contribution of weather to genotype × environment interaction 297
Gossypium spp.
Breeding for resistance to the tarnished plant bug 227
Water-stress effects on carbon exchange rates 239
Groundnut, *see Arachis* spp.
Growing-degree-days, *see* Thermal time
Guar, *see Cyamopsis* spp.
Harvesting methods
Effect of cutting height on yield and straw quality of lentil and wheat 49
Intercropping, *see* Multiple cropping
Irrigation, *see* Water regime, effects of
Latitudinal gradient, *see* Environment, influence of
Legumes
Phenological responses of soybean to air temperature and soil moisture 9
Phenotypic expression of a chlorophyll mutant in *Vigna unguiculata*: enviromental influences and effects on productivity 19
Yield determinants of *Cyamopsis*
1. Grain yield and pod number 29
2. Nitrogen accumulation and growth at high plant density 39
Effect of cutting height on yield and straw quality of lentil and wheat 49
Growth and yield of cassava influenced by soybean and nitrogen 83
Base temperature for application of growing-degree-day model to alfalfa 95
Effect of bordering soil moisture conditions on evaporation from soybean 161
Response of soybean to saturated soil
1. Patterns of biomass and nitrogen accumulation 171
2. Effect of treatments to alter photosynthesis and leaf nitrogen supply 189
Effect of different inter-row spacings on faba beans of different form 203
Water relations, nitrogenase activity and root development of legumes in response to water deficits 215
Contribution of weather to genotype × environment interaction in soybean 297
Induced mutations in grain legumes (book review) 303
Lens spp.
Effect of cutting height on yield and straw quality of lentil and wheat 49
Lentil, *see Lens* spp.
Lucerne, *see Medicago* spp.
Manihot spp.
Productivity in cassava/maize/okra/egusi melon mixtures 1
Growth and yield as influenced by soybean and nitrogen 83
Medicago spp.
Base temperature for application of growing-degree-day model 95
Modelling
Describing progress of apical development in wheat, based on time-course of organogenesis 147
Biomathematics in plant cultivation (book review) 304

Multiple cropping
Productivity in cassava/maize/okra/egusi melon mixtures 1
Growth and yield of cassava influenced by soybean and nitrogen 83
Effect of different inter-row spacings on faba beans of different form 203
Effect of 12 years' rice/wheat cropping and fertilizer on soil properties and crop yields in a sodic soil 277
Mutations, *see* Breeding
Nitrogen, *see* Nutrient dynamics
Nitrogenase activity
Water relations, nitrogenase activity and root development of legumes in response to water deficits 215
Nutrient dynamics
Yield determinants of *Cyamopsis*
2. Nitrogen accumulation and growth at high plant density. 39
Growth and yield of cassava influenced by soybean and nitrogen 83
Effects of nitrogen and early irrigation on root development and water use by wheat on two soils 103
Effect of yellow-berry on emergence of wheat 115
Response of soybean to saturated soil
1. Patterns of biomass and nitrogen accumulation 171
2. Effect of treatments to alter photosynthesis and leaf nitrogen supply 189
Water relations, nitrogenase activity and root development of legumes in response to water deficits 215
Phosphorus efficiency in wheat–a useful selection criterion? 257
Nitrogen balance of irrigated wheat on a red-brown earth 265
Effect of 12 years' rice/wheat cropping and fertilizer on soil properties and crop yields in a sodic soil 277
Organogenesis, *see* Phenology
Oryza spp.
Cultivated rice (book review) 167
Ratoon rice (book review) 169
Effect of 12 years' rice/wehat cropping and fertilizer on soil properties and crop yields in a sodic soil 277
Pea, pigeon, *see Cajanus* spp.
Peanut, *see Arachis* spp.
Pests, weeds and diseases
Effect of yellow-berry on emergence of wheat 115
Effect of different inter-row spacings on faba beans of different form 203
Breeding cotton for resistance to the tarnished plant bug 227
Phenology
Phenological responses of soybean to air temperature and soil moisture 9
Phenotypic expression of a chlorophyll mutant in *Vigna unguiculata*: Environmental influences and effects on productivity 19
Ear:Stem ratio in wheat; relationship with number of grains and yield 59
Describing progress of apical development in wheat, based on time-course of organogenesis 147
Response of soybean to saturated soil.
2. Effect of treatments to alter photosynthesis and leaf nitrogen supply 189
Water relations, nitrogenase activity and root development of legumes in response to water deficits 215
Water-stress effects on carbon exchange rates of *Gossypium* 239

Phosphorus, *see* Nutrient dynamics
Photoperiod, *see* Environment, influence of
Photosynthesis, *see* Phenology
Physiological maturity, determination of
Growth and development of Australian wheats 131
Physiology
Crop physiology in Czechoslovakia (book review) 79
Planting pattern, effects of
Yield determinants of *Cyamopsis*
1. Grain yield and pod number 29
2. Nitrogen accumulation and growth at high plant density 39
Pulses, *see* Legumes
Ratooning
Ratoon rice (book review) 169
Resistance, *see* Pests, weeds and diseases
Rice, *see Oryza* spp.
Root development, *see* Phenology
Root dynamics
Effects of nitrogen and early irrigation on root development and water use by wheat on two soils 103
Selection criteria
Phosphorus efficiency in wheat – a useful selection criterion? 257
Soils, *see* Environment, influence of
Soybean, *see Glycine* spp.
Spacing, *see* Planting pattern, effects of
Thermal time
Base temperature for application of growing-degree-day model to alfalfa 95
Effect of photoperiod and temperature on leaf initiation in wheat 121
Growth and development of Australian wheats 131
Triticum spp.
Effect of cutting height on yield and straw quality of lentil and wheat 49
Ear:stem ratio in wheat; relationship with number of grains and yield 59
Effects of nitrogen and early irrigation on root development and water use by wheat on two soils 103
Effect of yellow-berry on emergence of wheat 115
Effect of photoperiod and temperature on leaf initiation in wheat 121
Growth and development of Australian wheats 131
Describing progress of apical development in wheat, based on time-course of organogenesis 147
Phosphorus efficiency in wheat - a useful selection criterion? 257
Nitrogen balance of irrigated wheat on a red-brown earth 265
Effect of 12 years' rice/wheat cropping and fertilizer on soil properties and crop yields in a sodic soil 277
Genetic improvement in yield 289
Variety trials
Phenological responses of soybean to air temperature and soil moisture 9
Yield determinants of *Cyamopsis*
1. grain yield and pot number 29
2. Nitrogen accumulation and growth at high plant density 39
Ear:stem ratio in wheat; relationship with number of grains and yield 59
Effect of photoperiod and temperature on leaf initiation in wheat 121

Growth and development of Australian wheats 131
Describing progress of apical development in wheat, based on time-course of organogenesis 147
Effect of different inter-row spacings on faba beans of different form 203
Breeding cotton for resistance to the tarnished plant bug 227
Water-stress effects on carbon exchange rates of *Gossypium* 239
Genetic improvement in *Triticum* yield 289
Contribution of weather to genotype × environment interaction in soybean 297
Vicia spp.
Effect of different inter-row spacings on faba beans of different form 203
Vigna spp.
Phenotypic expression of a chlorophyll mutant in *V. unguiculata*: Environmental influences and effects on productivity 19
Water regime, influence of
Phenological response of soybean to air temperature and soil moisture 9
Effect of bordering soil moisture conditions on evaporation from soybean 161
Response of soybean to saturated soil
1. Patterns of biomass and nitrogen accumulation 171
2. Effect of treatments to alter photosynthesis and leaf nitrogen supply 189
Water relations, nitrogenase activity and root development of legumes in response to water deficits 215
Water-stress effects on carbon exchange rates of *Gossypium* 239
Nitrogen balance of irrigated wheat on a red-brown earth 265
Wheat, *see triticum* spp.
Yellow-berry, *see* Pests, weeds and diseases
Zea spp.
Productivity in cassava/maize/okra/egusi melon mixtures 1
